

MULTIDIRECTIONAL WASH HEAD

The flexible head is a portable unit that simultaneously washes and vacuums wastewater, greatly speeding up cleaning operations. Equipped with a multidirectional rotating washing system, it allows a high-pressure jet of hot or cold water to reach every point inside a barrel in just 90 seconds.

- ✔ Suitable for barrels of 225-228-300-500-600 liters.

Nominal Pressure	25 l/min	Maximum Temperature	Weight	Rotation Frequency	Feeding
140 bar	25 l/min	85°C	4.8kg	52 rp	230V/12V DC-50Hz

MANUAL BARREL WASHER 225-300 LITERS

The manual barrel washer for 225-300 liter barrels is a portable unit equipped with a multidirectional rotating washing system that allows a jet of high-pressure cold or hot water to travel through all interior points of a barrel in 90 seconds, performing an optimal and safe cleaning.

- ✔ It includes a minimum voltage safety coil in case of an electrical voltage drop.
- ✔ All sensitive parts of the machine (motor, reducer, etc.) are protected from water.
- ✔ Its design ensures a long lifespan and is entirely constructed of stainless steel, making it easy to maintain and clean.
- ✔ Prepared for 225-228-300 lt barrels
- ✔ Accepts hot water up to 90°

* Suitable for 225-228-300 liter barrels.

* NOTE: The pressure washer is not included in the standard equipment.

Power	Dimensions* (L x W x H)	Empty weight	Three-phase voltage	Material	Minimum wash time	Max. water temp.:	Impact pressure	Required flow rate
0.25 HP	1365x1180x680	42 kg	240/400V 50 Hz	AISI 304 Stainless Steel	90*	60 – 90°C	80 – 150 bar	15 l/min

MANUAL BARREL WASHER 225-300-500

Portable equipment equipped with a multidirectional rotating washing system that allows a jet of high-pressure cold or hot water to travel through all interior points of a barrel in 90 seconds, performing an optimal and safe washing.

- ✓ The model includes easily interchangeable adapters for washing barrels with a capacity from 225 to 600 liters.
- ✓ It includes a minimum voltage safety coil in case of an electrical voltage drop.
- ✓ All sensitive parts of the machine (motor, reducer, etc.) are protected from water.
- ✓ Its design ensures a long lifespan and is entirely constructed of stainless steel, making it easy to maintain and clean.
- ✓ Prepared for barrels of 225 – 228 – 300 – 500 – 600 liters.
- ✓ Accepts hot water up to 90°

* NOTE: The pressure washer is not included in the standard equipment.

Power (HP)	Dimensions* (LxWxH)	Empty weight (kg)	Three-phase voltage (v)	Material	Minimum Wash Time	Maximum Water Temp. (°C)	Impact Pressure (bar)	Required Flow Rate (l/m)
0.25	1470 x 1660 x 800	62	240/400V 50-60Hz	AISI 304 Stainless Steel	90"	60-90	80-150	15

MANUAL BARREL WASHER 500-600 LITERS

The manual barrel washer for 500-600 liter barrels is a portable unit equipped with a multidirectional rotating washing system that allows a jet of high-pressure cold or hot water to travel through all interior points of a barrel in 90 seconds, performing an optimal and safe cleaning.

- ✓ It includes a minimum voltage safety coil in case of an electrical voltage drop.
- ✓ All sensitive parts of the machine (motor, reducer, etc.) are protected from water.
- ✓ Its design ensures a long lifespan and is entirely constructed of stainless steel, making it easy to maintain and clean.
- ✓ Prepared for 500-600 liter barrels.
- ✓ Accepts hot water up to 90°
- ✓ The equipment includes as standard the guide trolley that allows and facilitates the loading, unloading and rotation of the 500 and 600 litre barrels, saving physical effort and working time.

** NOTE: The pressure washer is not included in the standard equipment.*

Power (HP)	Dimensions* (LxWxH)	Empty weight (kg)	Three-phase voltage (v)	Material	Minimum Wash Time	Maximum Water Temp. (°C)	Impact Pressure (bar)	Required Flow Rate (l/m)
